aramco

ManifaV2 is now updated and renamed to *ManifaPro2*:

ManifaPro2 family

release: 2.223
issued: Oct 18, 2020
To avoid any conflict, remove any previous versions before you install this release

Now in this release:

- **LatinX, Persian, and Hindi** support
- **Additional stylistic sets** including 3 scrambling modes and stylized letters
- **New variable parameters** for more flexibility in controlling the appearance of Arabic letterforms and size of Arabic diacritics
- **New options for numerals** including Western and Eastern numbers as proportional or tabular

The *ManifaPro2* font files are property of Aramco and are subject to commercial distribution.
Please do not copy, modify, or share without written permission.
For information, questions, and licensing, email: shahab.shahab@aramco.com khaled.saeed@aramco.com

bold italic

Important tips:

- All letter spacing and kerning of all weights and styles are already crafted to optimal measurements. For best results, select the "metrics" option in your kerning menu, not "optical."
- To take advantage of all the features, make sure you do **NOT** turn off ligatures or contextual alternates

basic character set

ManifaPro2 is a multilingual, bidirectional font family supporting both Latin and Arabic based scripts

tabular figures

ManifaPro2 offers tabular mode for numbers. This can be very useful in situations involving financial table layouts, lists of digits, clock displays, etc. Tabular numbers are mono-spaced while the default proportional numbers are custom spaced.

For Hindi tabular numbers in ***ManifaPro2***, select stylistic set 03 (ss 03). For Western tabular numbers, use the OpenType feature "Tabular Lining" as you normally would.
